

## Product Identification Guide

HotLok™ Blanking Panels are designed to fit mounting rails in IT equipment cabinets that conform to the 19 inch (483.4mm) width in the EIA/ECA-310-E standard. To accommodate the different openings in the standard three versions of HotLok are available. The differences between the three versions of HotLok Blanking Panels are in the size of the Guide Pins as shown below.

9.5mm Square

M5/10-32 Round

M6/12-24 Round

Positive identification of the specific standard opening for a HotLok Blanking Panel is engraved on each HotLok. The engraved opening identification is shown on the reverse side of each HotLok Blanking Panel at one end, as shown in the illustration below. The specific engraving is one of the following:

- 9.5mm Square
- M6/12-24 Round
- M5/10-32 Round

← rail opening indicated

*Note: HotLok Blanking Panels are sold by cartons and cases only*
